# High Speed Roller Shutter

## Product Characteristics.

Easy to use and durable, an array of colors for selection and matching

**Fast and silent :** The speed of doors roll up is several times faster than that of traditional roll-up doors, silent operation and low noise production.

**Safe :** Automated rebound and anti-pressure design, auto switch to manual operation in the event of a power shortage.

**Durable :** Strong and durable plastic-steel reel, densely woven silencer ,balance spring made of high quality steel.

### ALUMINIUM-CRYSTAL Roller Shutter

Polycarbonate shutter offers excellent choice for shop front , and any indoor shop exhibition. The best visibility , aesthetic look , and durability , its slat profile can be customized.

### ALUMINIUM Roller Shutter

The shutter door is powder coated on the surface so is anti-scratch and thicker than typical doors. It boasts a diversity of aesthetic colors , is durable and complements your front door design.

### FABRIC Roller Shutter

FABRIC doors are commonly used for entrances in temperature-controlled premises and clean rooms to facilitate the passage of materials. As these doors are usually subject to frequent operation, the maintenance cost has to be an important factor of consideration.
